

Impact Management Platform (IMP)

One secure workspace for delivery, MERL, evaluation, and finance — so your team spends less time on tools and more time on the work that matters.

Four paths. One home. Clear answers when you need them.

How we help. When people and programmes are hard to track, we help you see who you serve and what was delivered. When results are scattered, we help you know if you are on track and what to change. When funders and boards ask hard questions, we help you produce answers they can trust. When money lives in another system, we help you keep spend next to the work. One place for the whole journey — so nothing important falls through the cracks.

With you: You stay in control of what is final and what you share. We are here to make the path easier. Methodology remains with advisors; residual capacity remains with the host organisation.

1. Product domains

Domain	Capability	Outcome contribution
Delivery	People, consent, programmes, activities, milestones, import	Field truth
MERL	Indicators, periods, results, inquiries, learning, analysis, reports	Performance & learning
Evaluation	Evaluation engine for independent, decision-ready answers	Defensible judgements
Finance (EMS)	Claims, approvals, vendors, bills, donors, funding reports, card reconcile	Money in the same story
Platform	Multi-tenant orgs, roles, team invites, branding, help, assistants	Residual capacity

2. What we claim — and do not claim

- **Do:** Multi-tenant system of record across delivery, MERL, evaluation, and finance.
- **Do:** Structured evaluation support with team confirmation of what is final.
- **Do:** Branded evaluation products your organisation can present to funders and boards.
- **Do not claim:** Zero-human evaluation, offline national-scale field systems, or silent publish-as-truth.

3. Engagement models

- Self-serve / institutional product packages (see acquisition site).
- 90-day pilot path with implementation support.
- Hybrid advisory + product for complex multi-country evaluations.
